

## **Ahmed Sobhy**

Ahmed Sobhy, is holding a B.Sc. in Computer Science, Zagazig University in 2004 with an excellent degree in the graduation project that featured a Face detection and recognition software system.

This then has been followed by more than a decade of experience in the professional field in general and in software development in particular. During his professional career he went through many software projects in which he was responsible for managing projects, teams and implementing the full software development life cycle that includes planning, design, development, testing, deployment and maintenance. These projects ranged between Database systems, RFID for embedded systems, web applications, web services, networking applications, image processing and multi-threading real-time systems.

Ahmed Sobhy is a member of:

The Egyptian Software Engineers Association.

The Association for Computing Machinery.

The IEEE Computer Society.
